Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on June 30, 2006 has been entered.

In view of the papers filed June 30, 2006, the inventorship in this nonprovisional application has been changed by the deletion of previously-named inventors KASSI and SUGIURA.

The application will be forwarded to the Office of Initial Patent Examination (OIPE) for issuance of a corrected filing receipt, and correction of Office records to reflect the inventorship as corrected.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 70,71,74 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by applicant's admission of the prior art. Applicant discloses that the article, "M. Miyazaki, MRM 32, 52-59, 1994 teaches an MR imaging method where a slice-selective MT pulse is composed by an RF excitation pulse of which application time is long and gradient spoiler pulses. With respect to claim 74, the gradient pulse would inherently be applied in at least one of the directions set forth.

Allowable Subject Matter

Claims 56-59,64-69 are allowable over the prior art of record.

Claims 72,73 objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Response to Arguments

Applicant's arguments with respect to claims 70-71,74 have been considered but are moot in view of the new ground(s) of rejection.
